PERSONAL INFORMATION

I'm full-stack JS developer. Currently I switching my profession and learning WEB programming. I was trained at "GoIT" on the course "full-stack JS developer", and using WEB-learning I learning some more technologies. I have higher technical education. In the future I plan to upgrade my level in backend-development, on platform node.js, and to raise the level of English. I'm looking for a remote job or internship, mostly as a back-end programmer.

PROJECT EXPERIENCE:

- Project: Web Studio. Adaptive web-page of web studio. Technologies: HTML5 - CSS3 - SASS - BEM.
  Project link   Source files

- Project: Donut Masterclass. Team project, mobile-first adaptive landing. My tasks on the project are the slider and the background. Technologies: HTML5 - CSS3 - JS - SASS - BEM.
  Project link   Source files

- Project: Image finder. Search and view images. Technologies: JS-Handlebars-Parcel .
  Project link   Source files

- Project: Image finder. Event Booster. Team project, events finder. My tasks on the project, It's API and interaction of program modules. Technologies: JS-HTML5-SASS-Handlebars-Parcel .
  Project link   Source files

- Project: Image finder. Search and view images, useing React. Technologies: JS-TS-React-Webpack.
  Project link   Source files

- Project: Phone book. Work with backend and user registration. Technologies: JS-TS-React-Redux-RTK-ReactRouter6-MUI-Webpack.
  Project link   Source files

- Project: REST API "Contacts". Backend REST aplicationregistration. Technologies: NodeJS, MongoDB, Express, NestJS, Docker.
  Source files on Express   Source files on NestJS

- Project: Kapusta-finance. Final team project. My job on the project was to implement the server. Technologies: NodeJS, MongoDB, Express.
  Project link   Source files

WORK EXPERIENCE:

In the late 90s, I left the IT sphere and started to work in auto service. More specifically, the electronic control systems of the vehicle's units and automatic transmissions. Since then I worked at many technical stations. Now I return to the profession in IT.

EDUCATION:

- IT School GoIT "Full stack developer" (February 2021 - February 2022)
- National Technical University of Ukraine "Kyiv Polytechnic Institute" (1992 - 1998)

Computer systems and networks
Master's degree -System engineer
